

Einführung in die Kognitive Ergonomie

Wintersemester 1999/2000

Dr. Anthony Jameson
Fachbereich Informatik
Universität des Saarlandes
Postfach 15 11 50
66041 Saarbrücken

jameson@cs.uni-sb.de
Tel.: 0681/302-2474
Fax: 0681/302-4136

Class 1

<i>Vorlesung 1, Donnerstag, den 21. Oktober 1999</i>	1
<i>Vorlesung 1, Donnerstag, den 21. Oktober 1999</i>	1
<i>Scope and Goals</i>	2
What Can You Do Later?	2
Types of System	4
Types of Decision	5
Evaluation Criteria	6
Types of Factors	8
Book Chapters for This Course	9
Relationship Between Classes and Book	10
Reading Assignment for Class 2	11
<i>Framework and Case Study</i>	12
Norman's General Framework	12
Questions About the Kegworth Disaster	13
<i>Mental Models</i>	14
Definitions of "Mental Model"	14
Characteristics of Mental Models	15
Formation of Mental Models	16

Class 2

<i>Vorlesung 2, den 28. Oktober 1999</i>	19
Donnerstag, den 28. Oktober 1999	19
<i>Human Reasoning</i>	20
Types of Human Reasoning	20
Belief Bias in Deductive Reasoning	21
Prior Beliefs and Abductive Reasoning	22
Inductive Reasoning: Content-Dependence	25
<i>Skill Acquisition</i>	27
Knowledge Compilation	27
Automatic vs. Controlled Processing	29
<i>Categories of Expert Slips</i>	30
Description Errors	30
Context Errors	31
Capture Errors	32
Forgetting of Actions	33
<i>Reading and Homework</i>	34
Reading Assignment for Class 2	34
Homework Assignment for Class 3	37

Class 3

<i>Vorlesung 3, den 4. November 1999</i>	39
Donnerstag, den 4. November 1999	39
<i>Preattentively Distinguishable Features</i>	40
Example 1 and Definition	40
Example 2	41
Uses of Preattentive Distinctions	42
<i>Screens from the ACM Digital Library</i>	43
Association for Computing Machinery (ACM)	43
Making Presentation Fit Purpose	44
Search Results	45
<i>Kosslyn's Maxims for Graph Design</i>	47
Kosslyn's Maxims	47
Yet Another Optical Illusion	48
The Stroop Effect	49
Misleading Emphasis	50
An Unnatural Mapping	51
Violation of Familiar Conventions	52
Distracting Superfluous Detail	53
<i>Reading and Homework</i>	54
Reading Assignment for Class 4	54
Homework Assignment for Class 4	55

Class 4

<i>Vorlesung 4, den 11. November 1999</i>	57
Donnerstag, den 11. November 1999	57
<i>Designing Screen Hierarchies</i>	58
Broad and Deep Hierarchies	58
Basic Concepts	59
Case 1: Constant Time per Screen	60
Case 2: Proportional Time per Screen	61
Case 3: Logarithmic Time per Screen	62
Case 4: Proportional + Constant Time	63
Considerations Besides Time	64
<i>Top Ten Mistakes in Web Design</i>	65
1. Using Frames	65
2. Bleeding-Edge Technology	67
3. Scrolling Text, etc.	69
4. Complex URLs	70
5. Orphan Pages	71
6. Long Scrolling Pages	72
7. Lack of Navigation Support	73
8. Non-Standard Link Colors	74
9. Outdated Information	75
10. Overly Long Download Times	76
<i>Web Page Examples</i>	77
Visualizing Hierarchy: Example	77
Arranging Links: Examples	78
<i>Reading and Homework</i>	80
Reading Assignment for Class 5	80
Homework Assignment for Class 5	81

Class 5

<i>Vorlesung 5, den 18. November 1999</i>	85
Donnerstag, den 18. November 1999	85
<i>Fitts' Law for Hand Movements</i>	86
Fitts' Law: Demonstration	86
Fitts' Law: General Formulation	87
Fitts' Law: Approach Angle	88
Fitts' Law: Implications	89
<i>A Commercial Soft Keyboard</i>	90
Fitaly Virtual Keyboard	90
Fitaly vs. Qwerty	91
<i>Analysis of the Opti Keyboard</i>	92
The Basic Crossover Relationship	92
Design	93
Predicting Execution Times	94
Measured Execution Times	95
Extrapolation of Results	96
Measured Error Rates	97
<i>Alternative Hard Keyboards</i>	98
Alphabetical Keyboards	98
Half-Qwerty Keyboard: Design	99
Half-Qwerty Keyboard: Potential Use	100
<i>The Problem With the Isometric Joystick</i>	101
Isometric Joystick: Experimental Setup	101
Isometric Joystick: Results	102
<i>Hand-Printing for Text Input</i>	103
"Graffiti" for Text Input	103
Immediate Usability of Graffiti	104
<i>Reading for Class 6</i>	105
Reading for Class 6	105
<i>Homework Assignment</i>	106
Homework Assignment for Class 6	106

Class 6

<i>Vorlesung 6, den 25. November 1999</i>	107
Donnerstag, den 25. November 1999	107
<i>Working Memory</i>	108
Components of Working Memory	108
Working Memory: Mini-Experiment	109
What Determines Success in Retention?	113
<i>Long-Term Memory</i>	115
Encoding Specificity: Mini-Experiment	115
Questions About the Mini-Experiment	117
Long-Term Memory: Basic Concepts	118
Encoding Specificity: Basic Concepts	119
Encoding Specificity: Examples	120
<i>Reading</i>	121
Reading for Class 7	121
<i>Homework Assignment</i>	123
Homework for Class 7	123

Class 7

<i>Vorlesung 7, den 2. Dezember 1999</i>	125
Donnerstag, den 2. Dezember 1999	125
<i>Semantic and Articulatory Distances</i>	126
The Basic Model Again	126
Illustration of "Distances"	127
"Distances" in Execution	128
"Distances" in Evaluation	130
<i>The Direct Manipulation Paradigm</i>	131
Direct Manipulation	131
<i>Two Perspectives on Perception</i>	133
Gestalt View of Perception	133
Ecological View of Perception	134
Depth Cues	135
When Is Which Perspective Useful?	137
<i>Three-D Support for Document Management</i>	138
Screen Shots of the Data Mountain	138
Questions About the Data Mountain	141
"Distances" in the Data Mountain	142
<i>Work for Class 8</i>	143
Reading for Class 8	143
Homework for Class 8	144

Class 8

<i>Vorlesung 8, den 9. Dezember 1999</i>	147
Donnerstag, den 9. Dezember 1999	147
<i>Elastic Windows</i>	148
Non-Web Use of Elastic Windows	148
<i>Visualization of Web Sites</i>	150
WebToc Screen Shot	150
Questions About WebToc Video	151
Previews and Overviews	152
<i>Metaphors</i>	157
Conveying Mental Models (Revisited)	157
Pros and Cons of Metaphors	158
Questions for Evaluating Metaphors	159
<i>Work for Class 9</i>	161
Reading for Class 9	161
Homework for Class 9	162

Class 9

<i>Vorlesung 9, den 16. Dezember 1999</i>	163
Donnerstag, den 16. Dezember 1999	163
<i>Principles Formulated as Questions</i>	164
Principles Concerning Learnability	164
Principles Concerning Flexibility	167
Principles Concerning Robustness	170
<i>Designing a Mental Model</i>	173
Some Contents of a Mental Model of S	173
Mental Models in the Design Process	174
Desiderable Properties of Mental Models	175
Example Object Hierarchy	176
Conveying Object Hierarchies	177
<i>Work for Class 10</i>	179
Reading for Class 10	179
Homework for Class 10	180

Class 10

<i>Vorlesung 10, den 20. Januar 2000</i>	185
Donnerstag, den 20. Januar 2000	185
<i>Guidelines Concerning Command Names</i>	186
Guidelines Concerning Naming	186
<i>Mental Models Revisited</i>	187
The Role of Mental Models	187
Definitions of "Mental Model"	188
<i>The Usability Engineering Lifecycle</i>	189
Overview of the Entire Lifecycle	189
Comments on Lifecycle Models	190
The Requirements Analysis Phase	191
<i>Developing User Profiles</i>	192
Procedures	192
Welche Benutzergruppen sind zu analysieren?	193
Very Short User Questionnaire	194
Profile of a User Category	196
Importance of Usability Requirements	198
<i>Contextual Task Analysis</i>	199
Procedures	199
Which Actors and Use Cases?	200
Features of the Work Environment	201
<i>Reading Assignment for Class 11</i>	202
Reading Assignment for Class 11	202
<i>Design Project Assignment for Class 11</i>	203
Applying Design Guidelines	203

Class 11

<i>Vorlesung 11, den 27. Januar 2000</i>	205
Donnerstag, den 27. Januar 2000	205
<i>GOMS: Annotated Examples</i>	206
Text Editing Task	206
GOMS Analysis of Editing Task	207
Keystroke Analysis of Editing Task	209
<i>Case Study of GOMS Use</i>	211
DOS Interface	211
Original Macintosh Interface	213
Revised Macintosh Interface	214
Usability Problems Identified With GOMS	215
Observed vs. Predicted Execution Times	217
Learning Times	219
Effort Required for Project Activities	220
<i>Assignments for Class 12</i>	221
Reading for Class 12	221
Homework for Class 12	222

Class 12

<i>Vorlesung 12, den 3. Februar 2000</i>	251
Donnerstag, den 3. Februar 2000	251
<i>Comments on the GOMS Model</i>	252
Simple Example of a GOMS Analysis	252
Some GOMS Terminology	253
What Are Models Like GOMS Good For?	254
<i>Usability Engineering: Examples and Hints</i>	256
Checklist: Measurement Operations	256
Specification for Conferencing System	257
<i>Design Rationale</i>	258
A Graphical Notation for IBIS	258
A Textual Notation for IBIS	259
Textual IBIS: Basic Schema	260
Role of Textual IBIS in Practice	261
<i>Ubiquitous Computing: The "Digital Ink" Vision</i>	262
Digital Ink: Overview	262
<i>Wearable Computing: Nomadic Radio</i>	267
Wearing the Nomadic Radio	267
Notification Scenario	268
Nomadic Radio: Issues	269
Overview of Auditory Output	271
Scaling of Incoming Messages	272
Determinants of Message Priority	273
Dynamic Adaptation	274
Evaluation Results	275
<i>Work for Class 13</i>	276
Reading for Class 13	276
Homework for Class 13	277

Class 13

<i>Vorlesung 13, den 10. Februar 2000</i>	279
Donnerstag, den 10. Februar 2000	279
<i>Heuristic Evaluation</i>	280
What Is Heuristic Evaluation?	280
How Many Heuristic Evaluators?	281
<i>Usability Laboratories</i>	283
Typical Usability Labs: Photos	283
Typical Usability Labs: Layout	286
<i>Virtual Reality Issues</i>	287
Privacy Metaphors for Virtual Reality	287
<i>Input for Wearable Computers</i>	289
Implicit Input: Affective Jewelry	289
Questions About Methods for Explicit Input	290
Speech Input	291
Handwriting	292
Keyboards	293
A Specialized Pointing Device	297
Combination of Several Modalities	299
<i>Work for Class 14</i>	301
Reading Assignment	301
Homework Assignment	303

Class 14

<i>Vorlesung 14, den 17. Februar 2000</i>	305
Donnerstag, den 17. Februar 2000	305
<i>The DRUM Tool for Video Analysis</i>	306
DRUM Example Screen	306
DRUM Brochure	307
<i>Introduction to ClockPro</i>	311
Overall Design	311
Alarm Page	313
Setting the Alarm	315
When the Alarm Goes Off	320
<i>Comments by ClockPro's Designer</i>	321
Setting the Alarm	321
Errors	322
Automatic Processing; Real Alarm Clocks	324
Taking Human Limitations Into Account	325
Screen Design and Direct Manipulation	326
